DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4, 6, 8, 10, 12, 14-17, 24, 35-40, drawn to an optical node device that can implement 3R relay.

Group II, claim(s) 2, 5, 7, 9, 11, and 13, drawn to an optical node device that can request another optical node device to implement 3R relay.

Group III, claim(s) 19-23, drawn to an optical node device that requests a network control device to provide 3R section information.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the node device in Group I is that the node device can implement 3R relay for optical signals passing through it. The node devices defined in Groups II and III do not implement 3R relay.

The special technical feature of the node device in Group II is that the node device can request another optical node device to implement 3R relay for optical signals passing through both the node devices. The node devices of Groups I and III do not have this technical feature.

The special technical feature of the node device of Group III is that the node device can request a network control device to provide 3R section information. Node devices of Groups I and II do not requests a network control device to provide 3R section information.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to QUAN-ZHEN WANG whose telephone number is (571) 272-3114. The examiner can normally be reached on 9:00 AM - 5:00 PM, Monday - Friday.
